Web Developer | Cybersecurity Master's Student

Experience

Store Assistant - El Corte Ingles

November 2025 to November 2026

Carried out visual merchandising and maintained store presentation through regular restocking and shelf facing. Managed merchandise distribution and strategically arranged products on the sales floor to improve the customer shopping experience.

Hospitality Software Technician - Sumdit RPC

September 2025 to November 2025

Installed, configured and programmed networked POS systems, touchscreens and smart cash drawers, creating integrated, functional environments for point-of-sale management.

Web Development Intern - JHK T-Shirt SL

September 2024 to August 2025

Developed and maintained web applications using Laravel and Vue.js, implemented frontend and backend features, managed database content to generate dynamic PDFs, and optimised queries to ensure project quality and performance.

Screen Printing Assistant - Total Shirt SL

June 2024 to August 2024

Loaded and unloaded materials and T-shirts, organised stock efficiently on shelves, and monitored production to ensure screen-printed T-shirts met quality standards.

Education

GFPS DAW Dual- IES Pio Baroja 2023 -2025

Trained to design, develop and maintain dynamic web applications, ensuring functionality, usability and security. Proficient in programming languages, databases and web technologies.

GFPS Dietetica- Escuela Javeriana 2021 -2023

Comprehensive technical training in nutrition, dietary assessment, food quality control and health education.

Personal Projects

- **Home Network / Homelab:** What began as an old computer in my living room for deploying and testing my own projects has grown into a hub for my personal data and applications, expanded into a complete virtual private network.
- **Archivesphere:** Final-year project. A professional platform for organising and protecting information, with file management, role-based permissions, invitation-only registration and centralised administration.
- **Spendwise:** A web project for tracking income and expenses, with forecasts, shared templates, JWT authentication and interactive financial data visualisation.
- **Watermark:** A bilingual app for adding purpose-specific watermarks to PDFs. Documents are processed entirely in the browser and never leave the device.

Skills

- Programming (HTML5, CSS3, PHP, Laravel, Java, Angular)
- Database administration
- Version control (Git)
- Linux
- Docker
- Web layout
- Network administration
- Microsoft Office
- AI agent creation and management

Strengths

- **Teamwork.**
- **Creativity.**
- **Adaptability.**
- **Critical thinking.**
- **Personalised customer service**

Courses

- Cisco Certified Support Technician Cybersecurity Certificate
- Network Virtualisation with VMware Course
- Developing Cloud Solutions with AWS Course
- Course Cloud-Native Software Engineering

Volunteering

- APANID Christmas and The Three Wise Men Campaign Volunteer, 2022–2026: Collected, prepared and distributed gifts to service users at the centres.
